

# TERMINAL BOX K17 WITH ADJUSTABLE THERMOSTAT AND OVERHEAT PROTECTION

BACKER

## Description

Terminal box for control of relay or equivalent in three phase systems. Switching contacts, thermostat max 16A 240V. Temperature limiter protection max 10A 400V. Thermostat and temperature limiter are connected in serie to terminal. The box has also terminals for connection L1, L2 and L3 to the Load, internal in the box. There is a terminal for phase, zero or three phases,

internal in the box. Version -02 do not fit on standard cartridged because of thicker and longer bulb.
