## RADOME COMPOSITE CURING HEATING BLANKETS

## **Features & Benefits**

- Ideal for wet layup and prepreg composite repairs of radomes
- Perfect three-dimensional fit around your radome
- Excellent heat uniformity
- Easy to vacuum bag
- Moisture, chemical, and radiation resistant
- Compatible with ACR® hot bonders and your current equipment— wide variety of power plug choices

Voltage: 240 VAC

**Maximum Exposure Temperature:** 450°F (232°C)

Power Density: 5 watts/in<sup>2</sup> (0.78 watts/cm<sup>2</sup>). Other power

densities available upon request.

**Heater Construction:** Multi-stranded heating element is

uniformly placed to maximum heat distribution.

Dielectric Strength: Over 2000 volts

**Power Cord:** 6 ft (1.8 m) long with a standard ACR $^{\odot}$ 3 or MiniPRO $^{\top}$ 4 Hot Bonder compatible plug (NEMA L15-30). Other plugs and bare wire available upon request. See page 207 for options.

We can design a heater specifically for your application and aircraft: Other sizes, shapes, watt-densities, power plugs, built-in thermocouples, and more options are available. Part numbers ending with "C" include a NEMA L15-30 plug.

Provides uniform, even heat throughout surface

IMPORTANT: Temperature controller is required for this product. BriskHeat recommends the ACR® 3 or MiniPro™ Hot Bonder. See options starting on page 194.
